

Dynamic Bond Fund

H INSTITUTIONAL CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The PIMCO Dynamic Bond Fund is benchmark-agnostic multi-sector fixed income strategy with a global opportunity set that seeks to generate potentially attractive risk-adjusted returns. The fund utilizes PIMCO's global secular forecast and an integrated investment process across multiple sectors with a duration that may range from -3 to +8 years.

Potential Investor Benefits

This fund benefits from broad flexibility to navigate evolving market conditions, offers the potential for attractive risk-adjusted return, and strong diversification within an overall portfolio context.

Potential Fund Advantage

The fund's broader Investment discretion allows it to tap into credit, interest rate and currency opportunities across global bond sectors and regions. The fund can adjust its risk profile higher or lower to move nimbly across the global bond universe as conditions change, increasing exposures to segments with the most attractive risk-adjusted return potential characteristics.

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

Currency Risk: Changes in exchange rates may cause the value of investments to decrease or increase. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.

Liquidity Risk: Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

Mortgage Related and Other Asset Backed Securities Risks: Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

Current MIFID legislation prevents us from reporting performance data for funds with less than a 12 month track record. The benchmark is the 1 Month USD LIBOR. All periods longer than one year are annualised. SI is the performance since inception.

ABOUT THE BENCHMARK

The fund is considered to be actively managed in reference to the below benchmark as further outlined in the prospectus and key investor information document.

1 Month USD LIBOR (London Interbank Offered Rate) is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money in England's Eurodollar market. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.[†]

[†] Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. [‡]Yields reported gross of fees, the deduction of which will reduce the yield. [†]Annualised Distribution Yield is as of last quarter ending 04/30/2022. [‡]Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2022 Morningstar Ltd. All Rights Reserved.
